

NCR Corporation and Retail Systems Group

Transforming Transactions
into Relationships

NCR and Retail Systems Group offer a convenience store solution integrating point-of-service, back office and forecourt into one solution for your business.

NCR Corporation has partnered with Retail Systems Group to provide you a leading convenience store solution. Retail Systems Group delivers a suite of software applications on a single Windows® platform, while NCR delivers a highly innovative hardware platform – including the NCR 7454 POS System for Convenience Stores and powerful Windows NT®-based servers. Together, we deliver leading services to create a comprehensive solution for the convenience store industry.

Retail Systems Group focuses on providing an end-to-end business solution for the convenience store industry. They developed the Latitude P.O.S.™ System from years of retail experience, and market Advantage Energy Software's (AES) Retail/2000 back-office and corporate consolidation application. Retail Systems Group also specializes in business and operations analysis, project planning and implementation,

and other services for the convenience store industry.

Latitude P.O.S.

Latitude P.O.S. is an integrated, flexible, open architecture POS solution designed for convenience store operators. It is a quick and accurate way to capture information such as sales, tender and meter readings.

With the touchscreen system designed to be easy to use, new employee training can be completed in minutes or hours versus days. In addition, placement of keys and item names can be changed to meet operational requirements. Latitude P.O.S. can be personalized to each user according to their log-on preset. The touchscreen layout can even be changed based upon the hand preference of the user. For example, it can accommodate a left-handed or right-handed user. Latitude P.O.S. is designed to reduce labor expense, and allow more immediate use of the system. The quicker Latitude P.O.S. is implemented, the sooner you can start realizing the benefits.

Latitude P.O.S. is integrated with credit authorization and a pay-at-the-pump feature. It interfaces to most back-office systems, including AES Retail/2000. Latitude P.O.S. also supports tank monitoring systems and car wash controllers.

NCR Corporation and Retail Systems Group

Retail/2000

Look at Retail Systems Group as your single source for store automation. Retail Systems Group also markets AES' Retail/2000 back-office and store-consolidation application. Retail/2000 provides a c-store with complete back-office functionality, including: inventory control, purchase reporting, employee clock-in/clock-out functions, daily fueling activities and inside sales reporting.

Simplifying Your Complex Environment

The Latitude P.O.S. application runs on the NCR 7454 POS System for Convenience Stores – a powerful, flexible and durable platform. It provides a compact, integrated design and investment protection. This system leverages industry-leading technology, such as Web-based management and full multimedia giving you the ability

to use the terminal for interactive employee training.

The ruggedness and superior ergonomics needed in the convenience store industry are also delivered by the NCR 7454, using a common platform to simplify your already complex environment.

Delivering Superior Service

NCR offers complete services for your business challenges, incorporating consulting, needs assessment, project management, installation and maintenance, third-party product services and rollout management.

About Retail Systems Group
