

Transforming Transactions  
into Relationships

# NCR Mobile Retail Manager™

Inexpensive, wireless, handheld technology can help make your store managers more efficient. NCR Mobile Retail Manager (MRM) for NCR Advanced Checkout Solution (ACS) offers an architecture and application suite that frees store managers from the confines of the cash office, bringing the power of back-office data to the sales floor. Now store managers can spend more time doing what they should be doing—focusing on customers.

MRM for ACS provides users with the important tools that, until now, have only been available at the server level:

## PLU Maintenance

Address product issues immediately in real time. Change the price of any item, put slow movers on sale, correct an item's description and much more.

## Merchandising Message

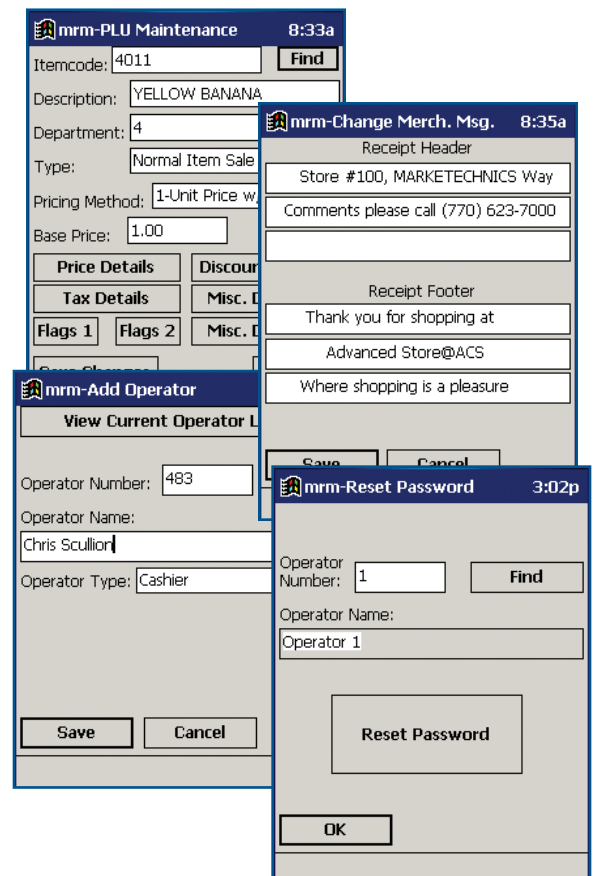

Add or change advertising text on the receipt trailer. Announce next week's sale. Showcase an employee of the week.

## Add Operator

Add a cashier name and operator ID right now allowing her to log in and start servicing customers immediately.

## Reset Password

If a cashier forgets his password, reset it using the handheld device so he can get back to work right away.

# NCR Mobile Retail Manager™

## Store Sales Summary

Get a quick snapshot of the day's sales in the palm of your hand.

## Cash Drawer Position

Don't let a register run over the cash drawer limit and hold up the checkout line. Plan your pickups for when it is convenient. This program shows you which lane is close to the limit in an instant.

## Department Summary

To know whether the meat department special is increasing sales, check the Department Summary report throughout the day.

## Item Movement

Check on how many units of an item have been sold today while you're thinking about it—right in front of the shelf.

In addition, any ACS back-office report can be custom-designed to fit on a handheld device to provide instant, wireless, retail management information.

## Wireless Hardware Supported

MRM supports all handheld devices capable of running PocketPC 2002 or Palm OS 3.5 or later.

For more information about the NCR Mobile Retail Manager™ and other NCR products and services, contact your local NCR representative or visit NCR at [www.ncr.com](http://www.ncr.com).
