

Thermal Transfer Labels

NCR provides a wide variety of both paper and synthetic face materials along with multiple adhesives to meet our customers' thermal printed bar coding needs.

NCR labels for thermal applications are carefully tested through our True Verification Quality process with thermal transfer ribbons, ensuring the highest scan rates and verification available in the industry.

Quality Label Solutions to Ensure the Highest Scan Rates.

Quality

- True Verification Quality (TVQ)- high quality bar code label materials are tested with thermal transfer ribbons to ensure consistent, first read scannability, durability and smudge resistance.

Extensive Customer Support

- Trained knowledgeable sales consultants are located throughout North America to help you design custom thermal labels to meet your application requirements.
- Specialists are available to recommend direct thermal label materials and thermal transfer label and ribbon combinations to achieve superior scan rates.
- Label engineers are located at the label plant to recommend cost effective label materials for a variety of label applications.

A Wide Variety of Stock Labels

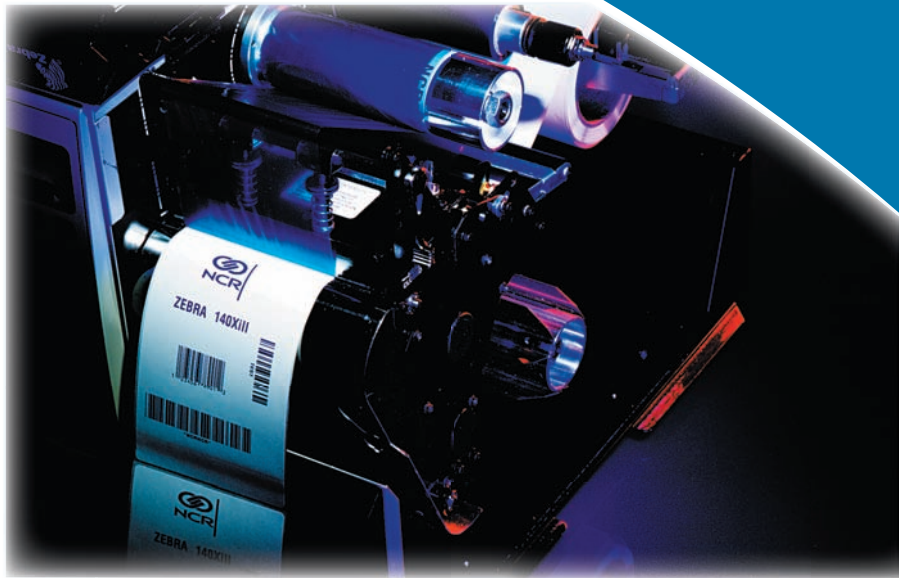

- The most popular label sizes and styles are available under NCR's "QuickShip" program.
- QuickShip labels have a permanent acrylic adhesive specifically designed for print and apply applications.

NCR Services

- On-Line Inventory Management Program- a secure Internet technology to place, monitor, track custom and stock product orders.
- Deferred Billing and Storage- to reduce customer inventory costs, NCR can store custom labels for up to 6 months.

Unique Programs

- Stock QuickShip Labels -
A variety of blank label sizes can be shipped within 24 hours to support standard thermal label needs.
- Risk Free Test Runs -
A small percentage of labels can be produced and tested at customer locations before a large production run is produced.
- Multiple Manufacturing Runs -
Customers have the flexibility to implement design changes between production runs while taking advantage of annual volume pricing.

Benefit from Partnering Directly with the Manufacturer

NCR Services

- On-Line Inventory Management Program - A secure Internet technology to place, monitor, and track product orders.
- Deferred Billing & Storage - To reduce customer inventory costs, NCR can store custom labels for up to 6 months.
- ProofNET - Offering on-line custom label proofs to review and modify with a click of a button.

Manufacturing Advantages

- Multiple plants both domestic and global to support international customers.
- ISO 9000 certified manufacturing facilities provide consistent quality driven label products.
- All plants are climate controlled for humidity and temperature providing consistent product quality.
- Extensive R&D product testing procedures to test and develop innovative label solutions.
